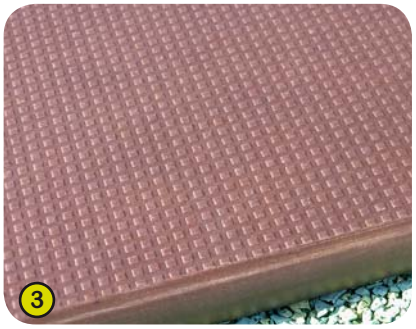
Tema Metal
Technical Specification

1- **The coloured panels** are made with a compact material 13mm thick. It is made up of 70% of softwood fibres and 30% of thermosetting resin, and it stands up to weathering very well (sun, rain, damp, etc.). The coloured surfaces are treated with products based on coloured acrylic polyurethane resins; this enables them to stand up well to UV radiation and resist damage.

2- **The 125mm diameter posts** are made of lacquered galvanised steel. The two-tone grey graining finish has a slightly undulating surface for increased scratch resistance.

3- **The platforms and the climbing walls** are made from a 12.5mm thick, textured, non-slip compact material (HPL).

4- **The tubes** are made of stainless steel, diameter 40mm, guaranteeing lasting durability and reliability of the equipment.
Injection moulded polyamide fixings connect the posts to the platforms and the various play features.



5- **The slide slope** is made of 304 stainless steel 2mm thick, shaped, bent and rolled in one piece.

6- **The ropes** are made from galvanized steel cable covered with polypropylene. **Injected moulded polyamide** connectors link the cables and keep the nets in shape.

7- **The climbing holds** are made of injected polyamide to combine rigidity with sturdiness.

8- **The stainless steel fixings** are protected by polyamide anti-vandalism caps.
