

Sandway Play Area

A Walk Through The Park

Client: Idverde, Bromley
Address: Sandway Road, Orpington, BR5 3TL
Budget: £75,000
Age Range: Toddler & Junior

Project Story

Sandway play area served as a play area with a walkthrough for the local community. It had been developed over the years but lacked a cohesive design to incorporate the landscape features either side of the central path. The client wanted play to take place throughout the park incorporating the different levels offered by the site.

Working in partnership with the London Borough of Bromley, The Landscape Group and Affinity Sutton. Proludic provided a solution through the installation of an additional path that took children to the top area of the slope. From there we designed routes of play down to the lower space by using stepping logs, scramble nets and a slide. Our use of the Origin range with its Robinia construction made the additional features fit seamlessly into the landscape.

After

> We have been working ... to transform the play area in Sandway Park following feedback from our local residents on the lack of activities and opportunities for young people. One of the ways we've addressed this is to provide new and exciting play equipment!

Origin Range

The Origin' range reproduces the very essence of what nature has to offer: a forest walk, crossing a stream over stepping stones or an uprooted tree trunk, a playhouse made of fallen branches, an adventure trail that includes climbing, sliding and observing. Children's senses are awakened and stimulated by visual and tactile contact with Robinia wood.
