

Playhouses

technical specification

J275 - J276 - J277 - J278

1- **The 125mm diameter posts** are made of lacquered galvanised steel. The two-tone grey graining finish has a slightly undulating surface for increased scratch resistance. **The caps** are made of injection moulded polyamide.

2- **The platforms** are made from a 12.5mm thick, textured, non-slip compact material (HPL). Further reinforcement is provided by lacquered galvanised steel supports, located on the underside of the platforms.

3- **The play walls and roofs** are coloured panels made from a compact material 13mm thick, 70% softwood fibre and 30% thermosetting resin, which stands up to weathering very well. The coloured sides are coated with pigmented acrylic polyurethane resins. This protects them from ultraviolet radiation and damage. **The durable fixings** are made of injection moulded polyamide

4- **The tubes** are made of stainless steel guaranteeing lasting durability and reliability of the equipment.

5- **The seats** are made of shock-absorbing rubber with non-slip surfaces.

6- **The stainless steel fixings** are protected by polyamide anti-vandal caps.
