

Origin' Playhouses

Technical specification

J4940 / J4941

1- **The different posts** (60 to 80 mm / 100 to 120 mm / 120 to 140 mm) are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The panels and the shelf** are made from larch (plank sizes 140 x 27 mm / 45 x 68 mm). Larch is naturally resistant and long lasting. **The roof** is made from larch logs (80 x 40 mm).

3- **The counting block** is made from larch (45mm x 68mm). **The rail** is made from 10mm diameter stainless steel.

4- **The porthole** is made from lacquered Marine plywood. The colour is applied by electrostatic spraying of two-component polyurethane lacquer that is free of heavy metals, to ensure high levels of resistance to potentially aggressive chemicals such as anti-graffiti cleaning products.

5- **The fixings** are made of stainless steel and protected by anti-vandalism polyamide caps.
