

# Inham Nook

## Play Space for The Community

Client: Vinci Construction Ltd

Address: Inham Nook, Pearson Avenue, Chil Well, Nottinghamshire, NG9 4GQ

Budget: £142,000

Age Range: 2-14 Years

### Project Story

With the construction of a second tram line running through the heart of an existing old play area, Broxtowe Borough Council, NET transport and Vinci Construction were required to provide local residents with a new and modern play space that would provide children of 2-14 years a safe and exciting environment. Situated adjacent to tennis courts, football pitches, fitness equipment and a cycle route, the new play area would be the final element to this large open space.

The Proludic team liaised closely with Broxtowe Borough Council to establish a "wish list" via consultation with local schools and the assessment of other recent successful local play projects. 3 separate areas including a toddler Zone, a junior Zone and a space net were provided. To reflect the modern, clean lines of the new tram system, the IXO multi-play unit was used, which is large enough for up to 20 users at a time as the centre piece.

After

Before

The Council has a good working relationship with Proludic, who has a unique range of imaginative and inspiring play equipment. The impressive facility has been very well received locally and many people now use and enjoy the park, which is exactly the outcome we desired.

- Chris Riley, Broxtowe Borough Council

## IXO Range

The Ixo range is designed with juniors in mind. Here, all considerations of playing like children, with children's play equipment, are left behind. Girls and boys want to test their strength, challenge each other, show-off, and make their own rules.

The Ixo range takes its inspiration from modern architecture and its design is contemporary, with clean lines and transparent structures.
