

Byes Lane Play Area

Consultation Catering for Everyone

Client: East Devon District Council
Address: Byes Lane, EX10 9QX
Budget: £30,000
Age Range: Junior & Teenagers

Project Story

East Devon District council wanted to refresh an existing play area that had come to the end of its life. The council conducted a consultation event within the local community, the consultation made it clear that the new play space had to cater to a wide end user, catering for both junior and teenagers.

Proludic have a large number of product ranges were more than up to the challenge of catering for a larger age range. The design for the new play space included an aeroskate and a large golgoth climbing structure to engage and challenge an older age range, suitable for the teenagers at the local youth club. The design also had a Vivarea multisplay unit and a small pod swing which is designed to appeal to a far younger age group. The play values in these pieces is more suitable for the play values for younger children, such as the children at the local primary school.

After

Biibox Equipment

A Biibox playground is predominantly metal in construction and designed to offer users between 2 and 12 years both adventure and strong sensations. It acts as a meeting point and encourages social interaction.

Public Consultation

Conducting a consultation with the local community, especially the younger generation, is a vital aspect of creating a new play or sports space, for several reasons:

- Discovering what the local residents need from the proposed area
- Ensuring that it is not simply a 'box-ticking' exercise
- Creating a design as a result of the consultation findings
- Fulfilling the identified 'need' creates a successful and sustainable play or sports space
