### Project Story

Leckhampton Parish Council were looking for a partner to support with a phased play area revamp. This involved ongoing support for all stages of the project from design, to consultation and fundraising. The goal was to create a strongly themed, robust, challenging yet accessible toddler/junior area for the community. Further play value was created on the existing tarmac pad including thermoplastic road ways and animal prints tying back into the overall design of the play area.

After

“ Absolutely fantastic service from concept of the project, through design to implementation. The quality of equipment is top notch and the site is now very well used and looks great. Would highly recommend Proludic and the team.

### Play for Learning

Playing is a fundamental requirement for a child's development, helping them evolve, both in terms of motor skills and at sensory, cognitive, creative and social levels. By playing children actively participate in their own development and growth. Play is, therefore, both the inherent mode of expression for children and is an important learning tool.
