Project Story

Andy's Adventure in Bestwood Country Park is a memorial for Andrew Maycock who lost his life aged 16. Unfortunately, the old play area had become dilapidated and as a result needed a complete make over. Andy was a member of the Air cadets so Proludic wanted to pay respect to Andy by installing a wooden aeroplane unit and a special plaque that played homage to him.

As the play area is in a country park, the new equipment needed to be in keeping with the natural surroundings. Therefore, it was decided to use Proludic's Origin' range which is made from Robinia wood. The play area includes trim trails, a large Multiplay Unit and a mini cableway.

Before

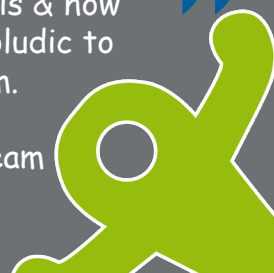

After

Since its completion the adventure playground has been in use daily & we have received only positive feedback about how fabulous it is, how brilliant the new equipment is & how it's a great improvement on the old playground. We would happily recommend Proludic to others as a company who, in our opinion, deliver quality, service & professionalism.

Proludic's Origin' range

The play equipment in the Origin' range reproduces the very essence of what nature has to offer. Origin' has grown from the instinctive desire children have to play and interact with nature. Our structures are made from Robinia wood and appear as part of the landscape, integrating the play area seamlessly into the natural environments.
