Budget:	£175,000
Age Range:	Toddler, Junior, Teenage, Adult
Ranges:	Diabolo, Dynamic, Urbanix
Surfacing:	Wetpour, Grass mat

Project Story: Woodville Recreation Ground is a popular community space used by residents of all ages. However, the old equipment was aged and needed updating. With the need for the equipment to be replaced having been identified, the Friends of Woodville Parish Council applied to various funding sources to complete a new play area installation.

Working alongside the local Parish Council, the Friends of Group approached three companies for designs that were shared with the residents. After being chosen as the preferred supplier, Proludic worked with the client to phase the project delivery and match funding availability.

Proludic's colourful, inclusive transport themed design for the toddler play area was developed by incorporating elements from Woodville's industrial heritage and was chosen by the children as their preferred design. Challenging equipment from the Dynamic range was selected for older children and teenagers along with a shelter to give them their own space on the site. An outdoor gym was also provided to enable parents and residents to be active throughout the year and make the area a family-friendly space.

Outdoor Gym

« The Play Area has been a huge success! At weekend the play area is packed with happy children with pupils flocking there on the way to and from school. Each phase has brought something new to the park and we have recommended Proludic to other local groups. »

Malc Gee, Chair of Parish Council and Friends of Group
