Address:	Springfield Park Road, Chelmsford, CM1 7PG
Budget:	£120,000
Age Range:	Toddler, Junior, Teenage
Ranges:	Adventure themed, Kanope
Surfacing:	Wetpour

Project Story: This Green Flag Awarded Park, Springfield Hall Park, is a much-treasured piece of public open space in the Springfield area of Chelmsford. Next to the park, down the embankment resides the local nature reserve that was used as inspiration as rare adder snakes which inhabit the spot.

Proludic created an exhilarating, eye-catching jungle-themed play area that offers a variety of challenging and dynamic equipment. The play area was designed to incorporate age-specific areas over two levels with an inclusive slope to access each zone. The lower zone was designed for younger children incorporating a double-width embankment slide, a climbing wall, and a focal jungle-themed multiplay unit. The junior and teenager area included a cableway, a trampoline, a forest-inspired Multiplay Unit taken from our popular Kanope range.

The Jungle themed graphics made the play area come to life which included adder snakes, monkeys, geckos, and a rambling river as a nod to the River Chelmer. The unique bespoke design makes the area eye-catching to all.

« After submitting designs in a competitive tender process, Proludic was shortlisted and later selected as the chosen playground provider with 198 votes from the residents in favour of the inspiring nature-themed design.

The new play area offers over 70 different play values catering to over 100 children. A range of inclusive equipment was also included to ensure children of all ages and abilities are catered for. »
