

An Out of This World Play Area for East Dunbartonshire

BISHOPBRIGGS PARK DESTINATION PLAY AREA

Client: East Dunbartonshire Council

Address: Glenburn Gardens,
Bishopbriggs, G64 3BU

Budget: £470,000

Age Range: Toddlers, Juniors,
Teens & Adults

Ranges: Metropolis, ACTI'Fit

Surfacing: Wetpour

East Dunbartonshire Council appointed Proludic to deliver a £470,000 play and sports destination designed to meet the needs of toddlers, children and young people, while responding to current and anticipated future standards for play, access, inclusivity, health and safety.

The existing fenced play area, outdoor gym equipment and wetpour surfacing were removed to create a fresh, ambitious space with a strong focus on inclusive play and movement. The Council's brief set out a demanding minimum equipment requirement, including multiple swing types, inclusive harness swings, a carer and tots swing, basket swing, rope swing, inclusive roundabout and wheelchair-accessible seesaw (J987). Proludic's design not only met this specification but expanded the offer with a wide variety of play, sport, sensory and family activities.

“ We're proud to have created an inclusive, space-age play destination that inspires imagination and offers something for everyone. ”

Roy Auld -
Regional Manager
(Scotland), Proludic

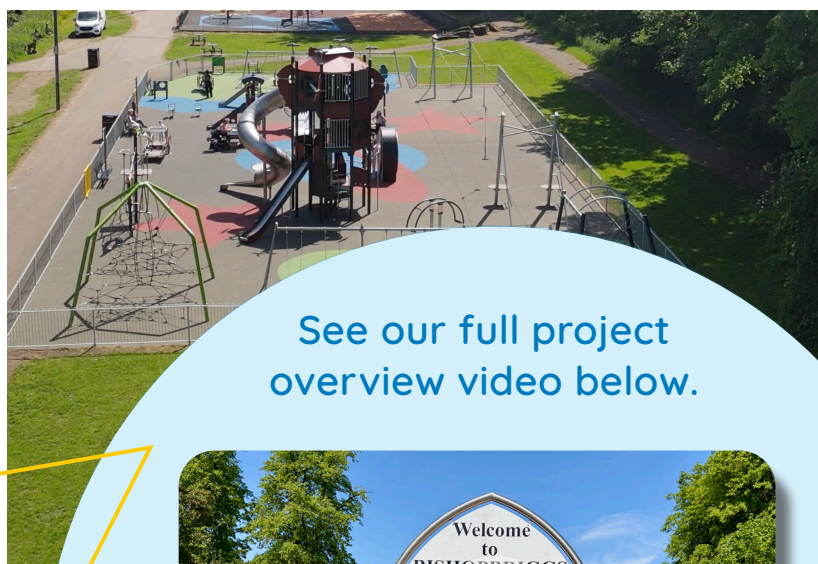

The completed scheme was themed around space travel and titled **“An Out of This World Play Area”**. At its centre sits a striking Metropolis multiplay unit (J47101) with a stainless-steel corkscrew slide, creating the large “wow” feature requested by the client. Alongside this, the design provides slides at four heights, a double-width slide, a 30-metre double cableway and a diverse mix of equipment encouraging swinging, rotating, climbing, bouncing and sliding. The play area offers 296+ play values and capacity for more than 154 users, while the outdoor gym zone supports 100+ users and 90+ sports activities, complemented by 15+ fun game activities for the whole family.

A key challenge was the site’s history of water gathering on the old play area. To address this, Proludic incorporated an extensive drainage solution across and beneath the site, improving long-term performance and usability.

Community consultation was held in the local library, with three companies presenting designs. Proludic received the highest number of public votes, demonstrating strong local support. Part-funded by the Scottish Government, the project created a vibrant, accessible and exciting destination that quickly captured the imagination of local children and families.
