Surfacing:	Wetpour, Tarmac

Project Story: Proludic was commissioned to enhance the play provision at Aled Way, a local housing area for children and military families. The client wanted to introduce a themed play space that would spark the imagination of local children, creating an engaging and enjoyable environment for play. Aled Way is a residential area primarily for children and military families. The location needed a safe, stimulating, and accessible play area to serve the local community's needs.

The project began with the removal of the existing equipment, followed by a new design that ensured a better layout and flow within the site. The redesign incorporated circus-themed equipment and wet pour graphics, transforming the area into a vibrant playpark that invited children to explore and play in a fantastical circus setting. Proludic created a vibrant playpark with a circus theme, designed to encourage children from the surrounding area to come together and play. The new play space was carefully crafted to foster imagination and physical activity among children.

We are delighted with the new circus-themed playground at Aled Way by Proludic. It has brought vibrant color and joy to our community, making the area more engaging and fun for our children. Proludic's attention to detail and improved layout have created a safe and imaginative space that meets our needs perfectly. >>

Proludic Ltd

Key features of the project included:

- Bright, Vibrant Circus-Themed Playpark: The entire area was transformed with circus-themed equipment and colorful graphics.
- Enhanced Layout and Flow: The new design improved the overall layout, ensuring better movement and interaction within the play space.

Proludic's transformation of the play area at Aled Way into a circus-themed playpark has provided the community with a vibrant, engaging, and inclusive space for children to play and imagine. The careful planning and community involvement have ensured that the new play space meets the needs of its users, creating a lasting positive impact on the local area.
