Project Story: Proludic is proud to have partnered with Costessey Town Council to bring a breath of fresh air to the local community with the recent renovation of the playground at Breckland Hall. This project stands as a testament to our commitment to creating spaces that are not only functional but also spark joy and creativity in children.

At the heart of this transformation are two brand-new Ixo multiplay units. Known for their versatility and ability to engage children of various ages and abilities, these units have quickly become the focal point of the playground. The Ixo unit and ACTI'Street equipment offer a variety of play and sports opportunities, from climbing and sliding to imaginative play, catering to a wide range of interests and skill levels. Their robust construction and vibrant design not only attract children but also ensure longevity and safety, which are key priorities in any Proludic project.

To complement the new play equipment, we installed fresh wetpour surfacing across the playground. This modern, impact-absorbing surface not only enhances safety but also adds a splash of colour, creating an inviting and visually stimulating environment.

The introduction of the Ixo multiplay units, designed specifically for teenagers, brings a dynamic and engaging space for older children to explore, challenge themselves, and socialize. Additionally, our ACTI'Street outdoor fitness equipment has been a fantastic addition, offering the community a fun way to stay active while enjoying the outdoors. >>

Kiran Chouhan
Area Manager
Proludic Ltd

Specific goals included:

- Adding new play equipment to facilitate age-appropriate play for teenagers.
- Revitalising the space and improving overall safety with new safety surfacing such as wetpour and removing worn or damaged surfacing.
- ACTI'Street fitness equipment has been introduced to engage teenagers and adults with a combination of fun-sport activities to improve overall wellbeing.

The ACTI'Street range is designed with the same approach that guides all Proludic equipment: combining fun with functionality. These robust, weather-resistant fitness stations are perfect for those looking to build strength, improve cardiovascular fitness, or simply enjoy a quick workout. With equipment such as pull-up bars, dip stations, and balance beams, the ACTI'Street area encourages a variety of exercises that can be adapted to different fitness levels, making it accessible and beneficial for both beginners and fitness enthusiasts.

The Breckland Hall playground project exemplifies Proludic's dedication to creating play spaces that are safe, engaging, and inclusive. By working closely with Costessey Town Council, we have successfully transformed an ageing playground into a dynamic environment that will serve the community for many years to come. We are delighted to see the space once again filled with laughter, exploration, and joy, and we look forward to continuing our work in creating play spaces that inspire and delight.
