

WELCOME TO THE SPACE JUNGLE!

BRODIE PARK PLAY AREA

Client:	Renfrewshire Council
Address:	Brades Road, Paisley, PA2 6JJ
Budget:	£150,000
Age Range:	Toddlers, Juniors
Ranges:	Diabolo, Kanopé, Metropolis
Surfacing:	Wetpour

Project Story: This imaginative play area was created to cater to children from toddlers up to 12 years old, with a focus on accessibility and inclusivity. Renfrewshire Council actively engaged with the local community pre-tender to gather feedback and insights on the types of play equipment most desired, ensuring that the final design was both reflective of the community's wishes and developmentally beneficial for a range of users.

The proposed play equipment, along with the layout and flow of the space, was carefully selected to allow children of all ages and abilities to play together. Replacing tarmac and wet pour islands with a continuous wet pour area served to fully cover any tarmac areas within the play space, creating a safer play environment and aiding accessibility by ensuring a smooth surface throughout.

The design centres around a “space jungle” theme, transforming the play area into a vibrant alien landscape where children can immerse themselves in adventurous role-play.

The creative narrative behind the space - “You have crash-landed on an alien planet full of new and exciting places to explore. Will you climb to the top to get a view of the land, brave the swinging vines, or stay back and fix your ship?” - encourages storytelling and exploration. Wet pour graphics were used to reinforce this theme with vibrant, space-inspired visuals across the surface.

Equipment was carefully selected to provide over 100 play values across the 14 pieces installed, supporting physical, social, imaginative, and sensory play. Standout items include the **J5619A Kanopé Multiplay Unit**, which offers climbing up to five meters; the **J444A Pendulum Swing** for group swinging experiences; the **J4062A Tema Metropolis** for varied play opportunities; and the **J4807A Single Pyramid** for more challenging climbs. Other thematic elements like Alien and Star Springers, space-themed play panels, and a fully accessible ground-level roundabout promote inclusivity and engagement. Numerous ground-level play features were incorporated to cater to users with varying physical abilities and ensure shared experiences for all.

This project was achieved with £150,000 in funding from the Scottish Government Play Park Renewal Programme.

We were very pleased with the recent play area renewal carried out by Proludic at Braids Road, Paisley. The project was delivered smoothly from start to finish, with clear communication and professional service throughout. The finished play area has been very well received by the community, and we're delighted with the quality and design.
