

SHREDDING NEW GROUND IN WALES

BRUNEL QUAY, MILFORD HAVEN

Client:	Neyland Town Council
Address:	Brunel Quay, Milford Haven, Neyland, SA73 1PY
Budget:	£40,000
Age Range:	Juniors, Teens, Toddlers
Ranges:	Rhino Ramps
Surfacing:	Tarmac

Project Story: Neyland Town Council sought to develop a new skate park on an existing tarmac pad. Having seen a previous installation featuring Rhino Ramps, they reached out to Proludic to explore potential solutions and develop a design that fit their vision and budget. Proludic worked closely with Neyland Town Council to design a functional and engaging skate space. This design was submitted as part of their external funding bid, which was successfully accepted, allowing the project to proceed.

The surrounding area required a cost-effective yet dynamic skate solution, ensuring accessibility for the local community. Proludic proposed a Rhino Ramp solution as a more affordable alternative to traditional concrete skate parks. This ensured that the council could stay within budget while still providing a high-quality skating experience for users of all ages.

We're excited to be part of the new skatepark at Brunel Quay in Milford Haven. It's fantastic to see the positive response from the community, and we're proud to provide a vibrant, safe space for skaters to enjoy. >>

Neyland Town Council secured external funding for the project. Proludic provided detailed designs and a comprehensive quote to support their funding bid, demonstrating that the allocated funds would be used effectively and appropriately.

One of the primary challenges was ensuring that all selected skate features could fit within the designated space while maintaining a high-quality experience. Proludic worked diligently to optimize the layout and maximize the available area.

The collaboration between Neyland Town Council and Proludic resulted in a cost-effective, high-quality skate park that meets the needs of the local community. By using Rhino Ramps, Proludic delivered a functional design within budget, ensuring accessibility for all ages. The layout was carefully optimised to make the best use of space, while securing external funding ensured the project's success. This project highlights effective planning and creative solutions for community development.
