

PLAYGROUND REFURBISHMENT UPGRADES FACILITIES TO ACCOMMODATE MORE CHILDREN

CLIFFORD PARK

Client: Kingsteignton Town Council

Address: Longford Lane,
Kingsteignton,
Devon, TQ12 3LH

Budget: £120,000

Age Range: Toddler, Junior, Families,
Inclusive

Ranges: Kanopé, City Themed

Surfacing: Wetpour

Project Story: Located centrally in the town of Kingsteignton, Clifford Park was in the need of rejuvenation due to some pieces of equipment and surfacing being too old and worn for safe use. Kingsteignton Town Council worked with Friends of Clifford Park to revive the facilities in this popular open space. The refurbishment provided the opportunity to increase the range of equipment for toddlers as well as install inclusive play items to provide a holistic play space for children of all abilities up to junior age.

Several local consultation events were arranged to keep the public involved at every step of the process. Online questionnaires were also utilised to understand the preferred choice of equipment and design by the community.

The final proposal saw the revamp of the existing space including the extension of the play area footprint, relocating some of the existing equipment and adding new equipment such as a large Kanopé multiplay unit (J5609). The addition of a Hammock (J445) and Pod swing (J441), inclusive roundabout (J2409) and the wheelchair-accessible trampoline (R34-ETP-000) addressed the brief and considerably improved the inclusive play provision. Furthermore, the train (J2616) and springers (J818, J834 and J835) offer a wider selection of toddler equipment.

« Proludic supported the Town Council and Friends of Clifford Park group over a number of years with fundraising and consultations to deliver the perfect play space. Based on the feedback received, Proludic tailored the designs for the new space to include the communities' requirements. The result is a colourful, engaging play space suitable for all children to use! »
