

PROLUDIC WORK IN PARTNERSHIP TO DELIVER DREAM NATURAL PLAY ASPIRATIONS

COGGESHALL BIG PARK PROJECT - PHASE TWO

Client:	Coggeshall Parish Council
Address:	Albert Gardens, Coggeshall, Colchester, CO6 1UA
Budget:	£170,000
Age Range:	Toddler, Junior, Teenage
Ranges:	Origin'
Surfacing:	Rubber mulch, Bark, Crushed stone

Project Story: Coggeshall Parish Council released a tender to refurbish their whole play area which is located on the green in the heart of the small town. They had a vision of using natural materials for the play space, however they didn't have funding for the project at that time. Coggeshall Big Park Play Project team worked very hard raising funds and Proludic assisted by attending events to show the community what the funds were being raised for.

After a mammoth fundraising period, the completed play area had a new inclusive toddler area and a dynamic, challenging junior area installed. The previous play area was very susceptible to the wet so the new surfacing was important to ensure the play area could be used all year round. Our solution for this was a mixture of bark and eco-mulch to cover the space and prevent potential mud issues. The pathways were made using crushed stone for suitable drainage.

The central area of the park is designed to be a focal meeting "hub" at the heart of the play area and is fully accessible from the main access gate through the new pathway.

« This nature-inspired refurbishment was achieved using Proludic's Origin' range. Manufactured from Robinia, the equipment sits harmoniously within the surroundings.

The new play area is fully accessible and inclusive in all aspects, from the choice of equipment and surfacing through to the play space layout. We also provided mounds to offer a variety of heights and allow children to explore. This sizable Play Area was delivered in two phases over three years. »
