DESBOROUGH RECREATION PARK

Desborough Recreation Ground in High Wycombe recently underwent a renovation as the old play area was looking dated and lacked an identity. The main goal of this play project was to create a fun and inclusive playground that would appeal to children of all ages and abilities.

One of the key features of the new play area is its diverse range of equipment that has been installed. Proludic used their creativity and imagination to redesign the play area to ignite children's imaginations by applying a forest animals' theme to the space to reflect the playground's surroundings. The new play area now caters to over 100 users at one time and offers over 60 play values for the children to try out.

Vivarea Multiplay Unit

Ka*Yop Multiplay Unit

Inclusive Swing
& Rotating Play Equipment

The new facility also includes a variety of inclusive equipment, such as an accessible roundabout ([J2406](#)) and a pod swing ([J441](#)). A panel educational game 'Can you find the forest friends?' matches in with the theme of the space. The focal point of the space is a 4-meter high dynamic Ka*Yop ([J56002](#)) structure, new for 2021 the item reflects nature in its design and caters to older junior children. For the younger children, Proludic have installed an easily accessible Vivarea ([J3338](#)) unit that offers a variety of different play values including a unique roller.

The playground was completed on time and within budget and has already been well received by the community. It has already become a popular destination for local families and has already helped to attract more visitors to the park. The new playground has also been praised for its accessibility and inclusion, providing children of all abilities with the opportunity to play and have fun together.

Overall, the Desborough Recreation Ground playground renovation project was a much-needed success for the community, providing a fun and inclusive space with an strong memorable identity for children to play and enjoy the outdoors.
