Address:	High Street, Ingatestone, CM4 0BA
Budget:	£85,000
Age Range:	Toddler, Junior, Teenage
Ranges:	Ka'Yop, Origin
Surfacing:	Rubber Mulch, Grassmat

Project Story: Ingatestone & Fryerning Parish Council were looking for a partner to deliver the refurbishment of their existing play area as the original equipment was installed several years ago.

Proludic proposed the new 2021 Ka'Yop Dynamic multiplay unit. Standing at 4 metres tall this unit certainly offered the WOW factor. This unit offers users from 3+ years play values all over, from play panels on the bottom deck to a sky surf from the higher deck of over 3 metres delivering a multitude of physical activities from sliding, rotating, gliding and climbing.

Alongside this amazing natural looking eye-catching unit, we also installed other popular items such as the group Rope-end swing, a wheelchair-accessible trampoline and roundabout to name a few.

To further enhance the area we designed a jungle theme wet pour graphic to ignite the children's imaginations, alongside an accessible path from both gate entrances improved the play area ensuring the majority of items were accessible all year round.

« This is the first Ka'Yop installed in the UK and it looks fantastic in its natural surroundings! The Ka'Yop range is ideal for areas where there is limited space as it is are filled with so many play values in a combined space, they ensure all children of all abilities and ages are catered for. »
