

INSPIRED CHOICE OF PLAY EQUIPMENT HITS THE RIGHT TONE!

GRANGE PARK LEAP

Client: William Davis
Address: Highland Drive,
Loughborough, LE11 2HT
Budget: £55,000
Age Range: Toddler, Junior
Ranges: Kanope
Surfacing: Grass mat

Project Story: Having worked with this Midlands-based housebuilder before, Proludic was heavily involved from the early stages of initial play area designs through to the implementation of the equipment. Proludic provided its expertise to get these spaces successfully passed through planning stages with the local authority.

The focal point for the play area is the multiplay unit from Proludic's popular nature-inspired Kanope range that can accommodate 23 children at any one time. A wood-effect finish was chosen as the timber effect panels were felt to best blend in with surrounding nature and rustic style houses close to the development.

Additionally, an inclusive pod swing and stylish helicopter springer for toddlers was installed along with a grass mat surface to bind the natural surface together and complete the nature-inspired theme.

« I was proud of what Proludic achieved on this development as not only did we specify a scheme that remains sympathetic to the natural location where the development sits, but also got it through planning seamlessly with our choice of natural-looking equipment. »

Kiran Chouhan,
Area Manager, Proludic
