

Hayton Community Playing Field

A Community In Need of A Space To Thrive in!

Client: Hayton Parish Council
Address: Main Road, Hayton, CA8 9HR
Budget: £62,000
Age Range: All Ages & Abilities

Project Story

Hayton Parish council was looking for a real community space that would provide a place for children to play and families to enjoy. This had to sit gently into the beautiful landscape where the project was located.

Proludic worked very closely with Hayton Parish Council to ensure that the equipment we selected would cover a wide age range of children. The equipment had to be gentle on the colour pallet and not affect the local environment. Using Vivarea this allowed us to provide large play value but also provided the soft colour tones that the area required. IXO with wooden posts covered activities for older children and helped with the consistency of colour for the site.

After

Before

Proludic have done a brilliant job and the play area is fantastic, when you stand back and look from a far, you can hardly notice and it doesn't look out of place with the surrounding area. That is exactly what we were looking for!

Play Spaces for The Whole Community

Playgrounds provide opportunities for local communities to come together at many different levels. They appeal to all ages, abilities and backgrounds, and they help both children and adults to meet and make friends. Creating a play space for varying age groups also encourages families to be active and have fun together.
