Project Story

Next to an existing Proludic Play Area was an unused tarmac area with two old basketball hoops. We worked with the Town Council and created an active area for all ages with a variety of activities.

Between the play area and the tarmac area we installed two bespoke Origin Trim Trial for children to race against each other. Nearby are bespoke educational ground graphics including hop scotch and snakes and ladder, also incorporated a popular fun ball game. This is great for families to play together. We also installed two table tennis which at whatever age you are everyone loves a game or two!

To compliment the area, we included a goal end which can be used by all ages, the ball games are basketball, football or netball. Nearby we located 8 pieces of Urbanix both hydraulic and static equipment which cater for 14+ years. We included a warm up and warm down area for users. The mayor opened the site and since the site is heavily used and there is nothing but positive feedback. Proludic were chosen for the USP of the Urbanix, that Proludic could do all the contract and the thoroughness and customer service throughout the process.

After

All went extremely well and very happy and have had great feed back from the residents, the installation company you use were excellent as was your Sales Executive Annabel they were both a credit to your company, excellent in every way - thank you.

- Tony Luff, Head of Ground Operations
