Address:	Francis Road, Bagington, Kenilworth, CV8 3AB
Budget:	£50,000
Age Range:	Junior, Teen, Adult
Ranges:	ACTI'Ninja, Inclusive
Surfacing:	Rubber Mulch

Project Story: Lucy Price playground, in Bagington near Coventry, had a tired and old climbing frame with some balancing items that were needing to be replaced with something more modern and challenging for the community to enjoy and engage with. Bagington Parish Council wanted a 'fun trail' solution that would engage the local community to be more active and something that would stand out from the crowd.

A traditional Robinia trail did not appeal enough, however, the client was enamoured by Proludic's new product innovation - the Ninja trail. ACTI'Ninja trails are thrilling obstacle courses promoting an active lifestyle for children (from age 6), teenagers and adults. They consist of different modules (individual sections of children's outdoor play equipment) offering different enjoyable physical challenges that can be combined to create unique timed trails.

« This is a fab play area, I've never seen anything like these items before and the kids love it! »

Bagington Local Resident

Therefore, this unique trail suited their needs perfectly as they wanted the new play equipment to be challenging, engaging and with an element of competitiveness inherent as the users challenge each other to races.

The Large climbing cube ([J1608](#)) offered a vast array of physical challenges from climbing to hanging for up to 20 users from the age of six, whilst the trail created a fun and active trail for juniors. Proludic also delivered an inclusive roundabout ([J2409](#)), Pod and Hammock swings ([J429](#)) and Hexagonal ([J482](#)) swings to offer juniors an array of play opportunities. The challenge of creating this space was recommending that the client slightly extended the trail area, which they were happy with as it meant that this focal became more meaningful and challenging.
