

Newham Grange Farm

Wooden IXO for The Local Community

Client: Middlesbrough Council

Address: Wykeham Way, Coulby Newham, Middlesbrough, TS8 0TG

Budget: £22,000

Age Range: Pre-Teens

Project Story

Proludic were tasked with creating a dynamic and visually appealing play area for junior age children at the popular Newham Grange Farm in Middlesbrough. An existing toddler area was already very popular however there was a distinct lack of provision for older children.

Working in partnership with the Landscape Development team at Middlesbrough Council, Proludic created a contemporary and challenging play area incorporating the Ixo multi-play, Aerospeed and Roll Up overhead roundabout. Laminated timber posts and stainless steel elements combine to create an impressive site that has proven very popular with junior visitors to the farm.

It has given the park a complete new lease of life and is a perfect accompaniment to a day spent on the farm.

After

Newham Holiday Park and Farm is such a fantastic attraction and Proludic's equipment fits in perfectly. The kids love the play area and it's really enhanced the whole area.

- Jennifer Tindsley, Landscape Architect, Proludic Ltd

Aerospeed Cableway

Roll Up

IXO

The Ixo range is designed with juniors in mind. Here, all considerations of playing like children, with children's play equipment, are left behind. Girls and boys want to test their strength, challenge each other, show-off, and make their own rules.

The Ixo range takes its inspiration from modern architecture and its design is contemporary, with clean lines and transparent structures.
