

ENSURING A LONG AND SUCCESSFUL PARTNERSHIP IN PLAY

MILLSTREAM MEADOW PLAY PARK, CHUDLEIGH

Client:	Chudleigh Town Council
Address:	Orchard Close, Newton Abbot, TQ13 0LR
Budget:	£120,000
Age Range:	Toddler, Junior
Ranges:	Ixo, Diabolo, Traditional, Dynamic
Surfacing:	Wetpour

Project Story: Proludic was tasked with creating a social space that would complement the existing pump track and gym area, ensuring inclusivity for families of all abilities. The project required durable, low-maintenance surfacing and equipment solutions to reduce ongoing upkeep concerns.

The first challenge was resolving maintenance issues caused by block edging around the surfaces. Our design connected the wetpour areas, forming a seamless and expansive play space. This not only eliminated maintenance concerns but also provided a larger area to maximise play value. The layout was carefully planned to align with user movement and age-appropriate play zones. We ensured that juniors and teens received new, engaging equipment different from other play spaces in Chudleigh.

“ We’re thrilled to see Millstream Meadow become a vibrant, inclusive play space. With adventure, accessibility, and durability in mind, we’ve created an engaging area for children of all ages to enjoy for years to come. ”

Inspired by outdoor activities in the picturesque Teign Valley's, the play area offers adventure and exploration opportunities. Key installations include:

- A 4-metre climbing net and curved monkey bars on the Ixo multiplay unit, promoting physical challenge and skill development.
- A toddler castle inspired by local St Martin Church, designed to support balance, cognition, proprioception, and physical activity. Themed thermoplastic graphics extend the play experience along pathways, encouraging imaginative play such as defeating dragons and scaling mountains.

A dedicated sensory area was developed with accessibility in mind. Features include:

- A tactile pathway for sensory stimulation.
- Low-level play panels for cooperative engagement.
- Proposed mounding with steppers and boulders to enhance motor skills.
- Totem poles with finger mazes and a communication panel to aid children in expressing emotions and interacting.

Challenges & Solutions

Weather conditions posed difficulties during installation, requiring careful planning to allow safe access for construction equipment. The team managed site logistics effectively, ensuring minimal disruption. The client praised Proludic's meticulous approach, commending the timely resolution of any concerns.
