Budget:	£200,000
Age Range:	Toddler, Junior, Teenagers
Ranges:	Diabolo
Surfacing:	Wetpour, SudsBond

Project Story: New Life Church in Milton Keynes wanted to create a vibrant community hub that would bring visiting children of all ages and abilities together in one safe, inspiring environment. The challenge was to deliver a play area and sports zone within a limited space while overcoming difficult site conditions and still achieving something truly inclusive, innovative and future proof.

The site presented unique obstacles. Gas pipes running underneath meant that traditional excavation was not possible, so Proludic's steel equipment, which can be surface-mounted and bolted, provided the perfect solution. To address level differences across the site, the ground was built up to ensure smooth transitions and safe access for all users. The restricted footprint demanded a design that maximised capacity without compromising on play value.

Overcoming underground constraints and level changes, this scheme shows how our innovative design can deliver a sustainable, future-proof community space for everyone.

The final scheme blends accessibility, sensory stimulation and adventurous play, making it a space that grows with children as they develop. A sustainable SudsBond pathway ensures every corner of the site is wheelchair-accessible, durable and environmentally responsible. Inclusive equipment was carefully chosen to provide opportunities for everyone.

A **wheelchair-accessible trampoline (R34-ETP-004)** allows every child to enjoy the thrill of bouncing. **Sensory and tactile play panels** encourage curiosity, creativity and collaborative play, while a **roundabout (J2400)** set at wheelchair transfer height offers true inclusivity for independent use.

To meet the needs of different age groups, **two multiplay units** were installed. For younger children, a welcoming unit (**J38126**) with a 0.6m slide, tactile features, balancing and climbing opportunities develops confidence and early physical skills. For older children, the Diabolo unit (**J38131**) delivers a more adventurous experience with a dramatic 1.4m helter-skelter slide, climbing nets, balancing trail, rope bridge and play panels. With 24 play functions, this equipment is accessible from age two, accommodates up to 15 users, and provides lasting play value. Alongside this, a large Multi-Use Games Area (MUGA) was introduced, painted with line markings for football and basketball and equipped with cricket wickets, creating a versatile sports zone to support group play, community events and active lifestyles.

The new play and sport space can now host over 100 children at once, creating a lively, welcoming environment where children of all ages and abilities can play side-by-side. By blending inclusive play, adventurous challenges and structured sports facilities, the site has become a landmark destination for the visitors, celebrating accessibility, overcoming site challenges and offering a legacy of joyful play.
