

CHRISTMAS HAS COME EARLY FOR MOOR ROAD, STRELLEY!

MOOR ROAD, STRELLEY

Client:	Nottingham City Council
Address:	47 Moor Road, Strelley, Nottingham, NG8 6LS
Budget:	£70,000
Age Range:	Toddler, Junior
Ranges:	Kanope, ACTI'Ninja,
Surfacing:	Grassmat, Rubber Mulch

Project Story: Before refurbishing this inner-city play area site, the client had earmarked Moor Road Play Area for investment. Nottingham City Council wanted the new space to accommodate both Toddlers and Juniors but also be inclusive for all to enjoy. The new play equipment had to be robust, durable and manufactured from steel and High-Pressure Laminate (HPL) components. The nets on the equipment also had to have a steel core. These play equipment design choices were introduced to better future-proof the site from anti-social behaviour. They also wanted the site to reflect a theme to tie the different zones together. Proludic were chosen as part of a competitive tender process as the council felt they had best met the brief and had the most suitable products for this play area.

The finished play area now offers 80 users the opportunity to access 9 pieces of play equipment, offering 59 play values, all set against a volcanic island theming.

« Proludic designed and installed an amazing play space for us at Moor Road, Strelley. Working with Proludic, the local community had a real input into what the play space would look like and the equipment will be well used for many years to come. The park was installed and opened in early December 2022, so Proludic helped the City Council to promote the new facility by arranging for Santa to visit at the opening event. The opening event was well-attended and Santa gave the children Proludic goodie bags, helping the event go down well with everyone who attended. »

Jo Tarrant, Greenspace Development Officer
Nottingham City Council

A focal Multiplay unit was adapted from Proludic's Kanopé range, including a speed slide on the 1.77m high platform side and an arched climbing net at the other end. Set in the junior area is a train named the 'Moor Road Jungle Train' (J2617) and a carriage (J2619) was installed accommodating up to 8 users. Also located strategically around the play area graphics were fixed onto the floor offering games like snakes and ladders, leaf hopscotch and lava crossing. A vertical jump activity from Proludic's new ActiNinja range (J5907) offers a popular jumping activity and a challenging opportunity for the children to be active.
