

REVITALISING AN OLD PLAY AREA

NORTH LEIGH PLAY AREA

Client:	North Leigh Parish Council
Address:	Park Road, North Leigh, Witney, OX29 6RX
Budget:	£76,000
Age Range:	Toddler, Junior, Inclusive
Ranges:	Diabolo, Kanopé, Ixo

Project Story: North Leigh Parish Council contacted three play equipment companies to visit and survey their site and produce a design that would bring their old-dated play area back to life within their allocated budget of £76,000. To save money Proludic utilised the existing wet pour that was in situ and recovered it and removed all older equipment except the cableway which was located at the bottom of the slope. We provided a variety of challenging and engaging new equipment that catered for a wide age range of children of all abilities from three of our popular ranges.

The focal point for the younger children is a multiplay play unit from our Diabolo range (J3857) which caters to children as young as 2 years. The unit offers 2 slides, one at 0.6 meters high and the other at 1.17 meters alongside different levels of climbing, traversing and tactile and sensory opportunities.

For the Junior children, we installed our challenging Ixo multiplay unit (J2535), known for being the most challenging monkey bars in the industry. The challenge is set as the arched monkey bars are difficult to complete the first time round. This teaches children patience, and a degree of risk assessment and offers healthy competition when competing against their friends. Vibrant mini-beast designs were laid into the new wetpour surrounding the equipment to inspire children about the nature around them!

« We introduced a variety of inclusive equipment including a wheelchair-accessible roundabout, trampoline, pod swing and a play house to ensure children of all abilities can play together. The area has been brought to life with colourful wetpour wear pads designed in a variety of shapes including a ray of sunshine, a butterfly, a spider and a caterpillar. »
