Ranges:	Kanopé, Dynamic, Traditional
Surfacing:	Wetpour, Loose fill

Project Story: Rushcliffe Country Park is a much-cherished Country Park for local families, nature enthusiasts, and visitors alike. Recognising the need for a partial upgrade to the play area, Rushcliffe Borough Council once again sought a partner who could deliver a modern, engaging, and inclusive playground. The playground upgrade was commissioned to provide the local community with a revitalised play area that caters to children of varying ages and abilities while bringing the older equipment to life with essential repairs and maintenance.

The vision was to create a vibrant, safe, and inclusive space where children could engage in active play, develop physical and social skills, and immerse themselves in imaginative activities. Proludic first partnered with the council on this park over two decades ago, and the importance of equipment maintenance and longevity remains as relevant today as it was back then. The durability of this focal medieval themed multiplay unit, which has stood the test of time and will continue to serve the community with proper upkeep, was a key factor in the council's decision.

I am especially pleased to see the addition of a new fully inclusive wheelchair friendly seesaw and the new Kanopé tower as we ensure the play area is a great place that all children can enjoy! ➡➡

Cllr. Andy Brown
Mayor of Rushcliffe
Rushcliffe Borough Council

The new playground additions feature a range of thoughtfully selected equipment including a jaw-dropping Kanopé Tower (J56100), a new innovative Pendulum Swing (J444A) as well as fresh, new safety surfacing to keep the space safe for years to come. The Kanopé multiplay Tower, a central feature of the playground, offers a multifaceted play experience with climbing, sliding, and imaginative play opportunities.

The benefits of the new playground extend beyond the immediate play experience. The revitalisation has increased physical activity among local children. The diverse range of play options available helps improve physical fitness, coordination, and social skills. Moreover, the inclusive design ensures that all children, regardless of their physical abilities, can enjoy the playground, fostering a sense of belonging and community. The inclusive wheelchair seesaw has been well received and much used by children of all abilities (J987).

By maintaining and repairing older play equipment within the space, Proludic could retain the essence of Rushcliffe Country Park's original playground while giving it a new lease on life. Combining new and restored equipment created a unified, vibrant play space that feels fresh, modern, and engaging.

Proludic takes pride in creating durable, easy-to-maintain equipment with low-cost maintenance. To support this, they developed a reparability index, scoring products out of 10 across criteria like documentation availability, ease of disassembly, spare parts availability, parts affordability, and Proludic's diagnostic and after-sales support. This ensures long-lasting, reliable equipment that's also economical to upkeep.

The revitalisation has had a tremendous impact on the community as can be seen from the opening event photography, offering a renewed sense of pride in the space. Families now enjoy a playground that looks brand new, with all equipment—from the oldest swing set to the newest climbing frame—shining with a sense of vitality and playfulness. The work carried out by Proludic has partly ensured that Rushcliffe Country Park remains a popular destination for local families for years to come.
