

DEVELOPER SITES RECEIVE PROLUDIC'S EXPERTISE

SCHOLARS CHASE PLAY AREA

Client: Taylor Wimpey Bristol
Address: Coldharbour Lane, Bristol,
Somerset, BS16 1ZH
Budget: £58,000
Age Range: Junior, Teenage
Ranges: Cyclogym, Origin'
Surfacing: Grass mat

Project Story: Taylor Wimpey Bristol asked for Proludic expertise and assistance to deliver two LAPS, one LEAP and a NEAP for their sizeable Scholar's Chase site in Stoke Gifford. Proludic supported them during the project with Local Planning Authority (LPA) sign-off that straddled two planning authorities and went on to deliver a phased rollout of the scheme across the three-year build program.

This roll-out also included a fairly unique request from one of the LPA's for a pump track to be included in one of the spaces. This was delivered using Proludic's Cyclogym range and included eight obstacles for cyclists to tackle around the track. The play area projects primarily consisted of equipment from Proludic's Origin' range. The wooden pieces of play equipment crafted out of Robinia wood offered a natural feel in keeping with the green surroundings of this development.

« I was delighted to be working with Taylor Wimpey Bristol again particularly as I knew I could help them get the planning application through the two authorities. The cycle track was a novel idea and the fact that we used wooden pieces of equipment enhanced the development while offering great play experiences for its users. »

Ben Jones,
Area Manager Proludic
