

TREETOP FUN HAS ARRIVED IN WESTERLEIGH, BRISTOL!

WESTERLEIGH PLAYING FIELDS, BRISTOL

Client: Westerleigh Parish Council

Address: Shorthill Road, BS37 8QP

Budget: £40,000

Age Range: Toddler, Junior

Ranges: Ka'Yop

Surfacing: Wetpour

Project Story: Westerleigh Parish Council sought to upgrade the play area at Westerleigh Playing Fields by replacing an aging timber structure that was no longer fit for purpose. The new structure needed to cater to children aged 3 and above, offering a diverse range of play functions for different abilities while maintaining durability and low maintenance requirements.

The playground is a well-used recreational space surrounded by mature trees, making it an ideal setting for nature-inspired play equipment. Given the constraints of the site, including existing fencing and other play structures, careful consideration was given to equipment placement to maximise space efficiency while maintaining safety compliance.

This impressive unit offers a high level of sensory inclusion with its play panels at the base, tactile, visual and sound elements throughout, whilst offering varied challenges climbing up to the large open slide

Our Solution

Inspired by the surrounding treescape, we selected the Ka'Yop Essential treehouse (**J56000**) from our Kanopé collection. This choice met the client's requirements for durability, minimal maintenance, and engaging play opportunities. The unit's design harmonised with the natural setting while offering a compact footprint to fit the available space. The key challenge was working within the existing site constraints, including the fence line and other play structures. The compact footprint of the Ka'Yop treehouse allowed us to maximise play value within the limited space while ensuring compliance with safety regulations.

Key Features

The Ka'Yop Essential treehouse supports up to 24 users and provides 29 play functions accessible from 3 years, including:

- 2m slide
- Climbing slope
- Traversal elements
- Tactile play panels
- Visual and sensory features
- Shaded seating area

This is a dynamic and engaging multiplay unit designed to enhance balance, coordination and confidence. Featuring multiple climbing points for children to explore and challenge themselves.
