

A LOW MAINTENANCE, LOW BUDGET, AESTHETIC LEAP!

WINNINGTON PLACE, CHORLEY

Client:	Anwyl Homes Lancashire
Address:	Winnington Avenue, Northwich, CW8 4FT
Budget:	£25,000
Age Range:	Toddlers, Juniors
Ranges:	Traditional, Origin'
Surfacing:	Wetpour

Project Story: Proludic was invited to competitively tender on an existing approved design for this client. Upon reviewing the design, Proludic offered complimentary advice on how to optimise it for an improved maintenance experience. Firstly, this involved shifting the fencing onto the wet pour surface to eliminate difficult grass maintenance areas and reduce the risk of strimmer damage to the wooden fencing at the post base. Secondly, we used blue-coloured wetpour pads in high-impact areas beneath the equipment, enhancing both the character of the play area and the durability of this hardwearing spots. We then collaborated with the client to meet the budget, successfully delivering the entire play area, including fencing and surfacing, for £25k – approximately £20k below the average cost of a LEAP.

The play area features Robinia wood play equipment, including a pod swing, seesaw, and two springers. This project faced weather-related challenges, as the site was wet before installation, requiring patience, ongoing communication, and multiple site visits before the work could proceed.

« Despite the small space, we've maximised every inch with our sustainable Origin' range, crafted from durable Robinia wood. This natural material not only blends beautifully with the surroundings but also supports our commitment to sustainability. The playground is more than just a place to play; it's a vibrant community hub where families can come together, share experiences, and build lasting connections. »
